

It's time to See the Light!

Higher Yield Increased Profit Less Maintenance

For All Livestock & Farming applications

Midwest farmers and livestock producers rely on LED lights for lowest cost, maximum efficiency lighting, and EAG-LED is a world apart from other LED manufacturers, we understand the need for quality fixtures that can withstand extreme heat and cold, and are truly water, dust and corrosion proof. No more replacing damaged lights, so your extreme low maintenance costs, rebates and utility savings mean more profit. Better lights that are livestock friendly means higher yield.

Your Property will be **safer and more secure**. Higher visibility translates nicely to more business and profit.

We even offer **no payments for 90 days**. You can experience the savings before you ever make a payment.

We guarantee personalized service and all the insight and expertise that comes from more than 50 years of combined LED lighting experience.

We want to be your LED solution!
