

INCREASE YIELD & EFFICIENCY

DECREASE LOSS, WASTE, SPOILAGE & SUB STANDARD PRODUCT

GENUINE LED GROW LIGHTS offer the absolute latest technology, extreme energy efficiency, with ultra low heat output and an ideal light spectrum range

Extreme low energy usage with low heat means less chillers. Fully optimized to feed the plants, kill the bugs and provide maximum growth and maximum output

LED lights are the most efficient, effective and crop friendly way to grow indoors, they're efficient, convenient, and the average LED lifespan is 50,000 hours

Real deal, full spectrum control with adjustable settings you can dial in 60/90/120 degree lenses, double roller and amazing low noise cooling

Programable remote and the ability to alter grow cycles for greenhouses

Unique heat dissipation, quality optics & superior power design

Fuller, more consistent harvests more often with maximum growth & output

Very low heat output means way low temperature and less cooling required

90+% Plant Absorption Rate vs. traditional light absorption of 5 - 8%

Completely eco friendly, no mercury or other harmful heavy metals

EAG-LED Lights meet or exceed all UL, CE and RoHS minimum standards

We genuinely want to be your LED solution, and we answer questions for free
